WG789 (19")	\$529.99	\$499.99	Up to 1/3 acre

- If you are looking for a new lawn mower, we encourage you to bring your gas-powered mower to the Enoree Residential Waste and Recycling Center during this month-long opportunity.
- No gas-powered mower to bring? No problem! You still can purchase an electric mower at the discounted price!
- You will receive a coupon with instructions to place the order directly with the participating vendor of your choice. Discounted event prices include taxes, shipping and handling. There will not be lawn mowers on site for sale.
- You do not need to drain the fuel from your old mower.

**Reasons to trade-in your gasoline-powered mower and purchase an electric mower**

- No gas or oil required.
- Low maintenance. No annual tune ups required.
- Cost effective — charge battery vs. purchasing fuel.
- Hassle-free starting.
- No emissions and accidental spills.
- Less noise pollution — virtually silent.
- Better for your health (no fumes to breathe!), air quality, and the environment.
- Exchanging 1,000 gasoline-powered lawn mowers for electric mowers has the potential of reducing volatile organic compound (VOC) emissions by 9.8 tons per year, which is equivalent to removing 230 cars from the highways. Click [here](#) to learn more. (Source: U.S. Environmental Protection Agency)
- Hourly, a push mower emits as much pollution as 11 cars and a riding mower, as much as 34 cars. Click [here](#) to learn more. (Source: U.S. Environmental Protection Agency)
- In the U.S., each year, approximately 17 million gallons of gasoline are spilled refueling lawn equipment. Spillages release harmful fumes into the air and contaminate ground water. Click [here](#) to learn more. (Source: NY Department of Environmental Conservation)
