

### Completed Mitigation Initiatives

The implementation of the mitigation initiatives proposed as a result of the Disaster Mitigation Committee's planning process is an important measure of the progress in implementation of the Greenville County Multi-jurisdictional Hazard Mitigation Plan. As the participants in the planning are able to implement more and more of the proposed initiatives that have been incorporated into the plan, the facilities, systems and planning areas of Greenville County can become more resistant to the impacts of future disasters.

Several of the mitigation initiatives proposed in the original plan have been implemented. Below are pictures from the Dwelling Elevation Program initiated in September 2004.

**A Completed project**

**Another project nearing completion**

**The elevation is now complete**
