

**Judith F. Wortkoetter, P.E.**  
**County Engineer**  
**Land Development Division**  
**(864) 467-4610**

## Notice to Engineers

The results of the survey have been tallied. By a 2/3<sup>rd</sup> majority, you were not in favor of a 20 day review option.

Additionally, the majority did not indicate they would utilize the expedited review option.

Therefore, the LDD will continue the current procedure of a ten day plan review with the standardized submittal package (including a 360° map and data table, pre-design meeting requirement, and standardized software).

The Land Development Division will be incorporating the changes to the requirement of the owner being present at pre-design meetings. If the owner is in the development business, they will not be required to attend as long as the owner acknowledges their responsibilities and is aware of the potential penalties under the NPDES permit requirements of the Clean Water Act. However, a signed acknowledgement form must be included in the submittal package.
